My dear Professor

Your favor of March 21<sup>st</sup> arrived in due season & I thank you for the information which it contains. First of all let me congratulate you upon your promotion to the Professorate which I am sure is well deserved. I am glad to learn that your history of Ethnics is so near its completion. I am particularly pleased to know that I did not fail to send you a copy of my "Elements" & to learn that you noticed the work at some length in the Phil. Monats hefte. Some years ago I subscribed for this journal but interrupted it after a little, but I can doubtless find a copy in New York in the Astor library or elsewhere.

As you kindly asked me, what disposition to make of the duplicate copy of the work will thank you to send it to. Here

Dr. F. H. W. Rastor Struckenberg Amerikanischer Pastor  
18 Paulow Strasse Berlin. I await with some

interest your presentation & criticism of Kant's  
Ethik & with still more your disposition of Hegel  
who is a veritable Cory to all English &  
American students, except the few who know  
themselves to be Hegelians par excellence. Like the  
Chairs of Glasgow, & the late Prof. W. H. Green of  
Oxford whose Prolegomena to Ethics you doubtless  
know. But I must not take your time, except  
to notice Martineau's Types of Ethical Theory  
which is very brilliant & suggestive more  
rhetorical than severe & exact yet full of  
interest. His work & his Study of Religion  
are remarkable for many reasons. The last seems  
to me the superior of the two. But I must  
not detain you longer.

Very truly, Yours

Noah Porter
